## CULVERT AND GATE REPAIRS

In cooperation with Solum & Frederikssund Municipality

Environment Solutions helped to dam a stream during the cleanup and repair of a gate that enables the municipality to control the culverts' flow. .

# CULVERT REPAIR AND MAINTENANCE

## Smarter – Faster and more Efficient!

Solum, a private company supplying a wide range of environmental services was asked to repair a culvert gate for the municipality of Frederikssund.

They decided to use a range of our NoFloods Barriers to dam up the stream and secure a safe and dry work environment.

Approximately 20m of NoFloods Barriers and 10m of NoFloods FlexWall was easily deployed in damming up the stream.

This helped them to optimize the process of repair and maintenance.

Water level was maintained by pumps to avoid overflow.
